Projects

Weather Web-App | *HTML, CSS, JAVASCRIPT* **Link**
- Developed a simple well organized Weather Forecast Application using HTML, CSS and vanilla JS that gives current temperature, min/max temperatures, humidity, wind speed, etc.
- It uses OpenWeatherMap API to fetch current and predicted weather data of 5 days of searched cities.

Quiz Web-App | *HTML, CSS, JAVASCRIPT* **Link**
- Created a simple Quiz application that contains a set of curated questions and its answers and checks for the correctness of the answer given by the user.
- There is a time limit set for answering any question. After a time limit or the user selects any option, the correct answer is displayed to let the user know whether he answered correctly or not.
- After the quiz ends, a report page is displayed showing the number of questions answered correctly as score.

Memory Game | *HTML, CSS, JAVASCRIPT* **Link**
- This is a retro grid-based game in HTML, CSS and Javascript using its DOM Selectors and Event Listener.
- Also known as the Concentration card game or Matching Game,it is a simple card game where you need to match pairs by turn over 2 cards at a time.
